

# Under Construction: Yet Another Alpha Complex

[Technological advancements](#) allowed [state violence](#) to be performed on a greater and more efficient scale, yet stealthy, extremely stealthy, [close to formlessness](#). In fact, if they came for you, you wouldn't see them coming, while they see everything.

As a consequence of some [never quite explained crisis](#), the major powers we associated with [political power](#) within the globalised world - The US, China, the EU, and Japan are no more. The world's governments were replaced by a global "democratic" order in which a variety of corporate and some NGO based political groups compete with one another for electorally generated power.

A plethora of technological developments - facilitating deadlier weapons, genetic modifications resulting in various forms of mutants, new forms of oppression and violence, and a huge [inequality gap](#) between people and between what was left of "countries" - appeared. And of course, some hackers saw the apocalypse coming, [collaborated to the best of their knowledge](#), and ... an Alpha Complex is being built underground, to protect its citizens.

Welcome to Yet Another Alpha Complex, an adaptation of the infamous tabletop role-playing game Paranoia, moving it from tables in the US into life size simulations. Why? Because [The Computer](#), still extremely paranoid and buggy, says so. And all of its citizens are its agents - as well as being mutants and members of secret societies and all kinds of intelligence agencies.
